What is: **Willo'Wind Farm Vegetable CSA?**

Willo'Wind Farm is a 50-acre family farm based in Zephyr, Ontario, since 1983. Our garden is cultivated using organic practices and our farm is home to many farm animals and other wildlife.

Community Supported Agriculture (CSA) is a system of growing and distributing organic produce that restores the connection between farmers and community supporters. CSA systems provide farmers with an equitable return for their labor and establishes a strong foundation for sustainable agriculture while contributing to a healthier environment

By **purchasing a CSA** you are guaranteed a weekly portion of fresh vegetables that are harvested straight from our gardens throughout the summer months. Your commitment also supports sustainable farming, preserves biodiversity, and builds a healthier, local and sustainable food system
